

Horizontal Basket Strainer

TYPE FH for horizontal pipe run

- All dimensions are in inches and based on an ASME flanged closure
- Dimensions shown are good through 600# ASME
- Standard design is based on ASME B31.4

- Many quick opening closure options are available (see Bulletin OA-112)
- Open area ratios are based on using a 40% open area basket media (see Bulletin AC-112)
- Larger line sizes and custom designs are available

LINE SIZE (IN.)	COMMON DIMENSIONS (IN.)							APPROXIMATE OPEN AREA RATIO	LINE SIZE (IN.)
	OD	A	B	C	D	DRAIN	VENT		
4	10 3/4	34	52	15	16	2	1/2	1,775%	4
6	12 3/4	39	58	17	20	2	1/2	1,382%	6
8	16	47	68	18	21	2	1/2	1,176%	8
10	18	50	72	20	22	2	1/2	946%	10
12	20	58	81	22	25	2	1/2	866%	12
14	20	63	89	24	30	2	1/2	871%	14
16	24	68	96	25	34	2	1/2	817%	16
18	26	72	103	26	38	2	1/2	775%	18
20	30	75	109	29	41	2	1/2	743%	20
24	36	83	122	32	48	2	1/2	694%	24

Minimum Information Required for RFQ (see Strainer Bulletins SD-118 and SI-112 for assistance)

1. Quantity
2. Line size
3. ASME flange rating or beveled for welding
4. Design pressure, temperature & flow rate
5. Piping design code (ASME B31.4 is standard)
6. Basket media size (see Bulletin AC-112)
7. Housing and basket material (carbon steel is standard)
8. Other special requirements or specifications (paint, etc)

Estimated Pressure Drop with Clean Basket

TYPE FH for horizontal pipe run

Note: All pressure drops offered are estimates based on a clean basket and can vary due to basket blockage, location of blockage, flow dynamics, etc..

Based on basket media of 40% open area.

CORRECTION FACTORS - MULTIPLY PRESSURE DROP BY:

VISCOSITY SSU	BASKET/MEDIA OF 40% OPEN AREA	WITH WIRE MESH LINER		
		40 MESH	60 MESH	80 MESH
30 (WATER)	USE CHART	1.3	1.5	1.6
500	1.6	1.9	2.1	2.4
1,000	1.7	2.2	2.4	2.6
2,000	1.9	2.4	2.7	2.9

EXAMPLE: A 6" line flowing 1,000 GPM liquid with a specific gravity of 0.6.

To find the pressure drop, enter the chart at 1,000 GPM and intersect the line representing a 6" FH strainer. Read to the left to intersection of SG = 1. Follow diagonal guide lines down to SG = 0.6. Read straight to the left for the corrected pressure drop. In the example, the FH strainer would have a pressure drop of 0.45 PSID. The strainer section would depend upon piping configuration and allowable pressure drop.

Materials Data

Perforated, Expanded Metal and Wire Cloth Media

Perforated patterns normally stocked

PATTERN		% OPEN AREA	# HOLES PSI	MATERIAL/GAUGE		
DIA	CENTERS			C.S.	304SS	316SS

60 x 60	.0075	.0092	234	30.5
80 x 80	.0055	.0070	178	31.4
100 x 100	.0045	.0055	140	30.3

20 x 20 Mesh

40 x 40 Mesh

*Number of wires per linear inch. All meshes shown are available, in 304SS and 316SS. Other meshes and materials are available upon request. All dimensions in inches. C.S. = Carbon Steel

Linear Equivalents:
 1 micron = .0000394 inches
 25,400 microns = 1 inch
 See Bulletin TG-112 for a comparative chart.

Optional Accessories for Strainers

These illustrations represent just some of the quick opening closure types used.

Threaded Closure

Double Bolt Closure

T-Bolt Hinged Closure

Davit for Blind Flange Closure

DP Gauge Assembly

Legs or Base Skirt

Flat Top Basket Offset Nozzles

Blowdown Basket

Side Drains
